

CROPTIMISE your grain

Meet three criteria and you can
enjoy the benefits of GrainCorp CROPTIMISER

1. Eligible
Load

+

2. Grower Quality
Equity

+

3. Site Stack
Quality

=

Upgrade

Optimise the quality of your grain (and returns) with this simple process:

- Upgrade your warehoused tickets to adjacent higher grades.
- Qualify through a three-criteria eligibility.
- Call the Grower Hotline any time to check an eligible load.
- SMS messages notify when you might have an eligible load.
- GrainCorp CROPTIMISER is the simple way to optimise the quality of your warehoused grain – and increase your return.

Grain delivered into warehousing over harvest can benefit from quality equity available at the GrainCorp site of delivery.

Once you've built equity in your own warehoused grain, you may be eligible to upgrade your warehoused tickets to the adjacent higher grade.

We're here to make it easy.
